

# Professional Services: Process Audit

Spend two days auditing each ERP module in the quote-to-cash flow with our expert operations Consultant at your facility. Get a tailored plan to address findings and ensure you achieve your desired future state.

- Evaluate & understand your current processes & where improvements are needed
- Work with your experts to gain insight into how your system is currently being used
- Deep dive into your use of individual modules to make sure you are using your ERP to its full potential
- Review external processes & identify opportunities to integrate & simplify
- Identify & address weak points & inefficiencies
- Create a plan with immediate & long-term action items to improve your utilization right away
- Report broken down by each area of your business

## **BENEFITS**

- Receive a full report of all findings, associated recommended changes & estimated ROI once those changes are implemented
- Better understand your company & processes
- Drastically improve your ROI & the use of your ERP
